

## **Agreement for the use of the Grenoble Health Smart Home Database**

Health Smart Home is an active research topic and activity recognition in these environments is still an investigated and open problem. This database, devoted to activity recognition, is distributed free of charge, for an academic and research use only, in order to be able to compare the results obtained.

By signing this form, the researchers that request the use of the database agree to the following restrictions:

1. **Redistribution:** This database cannot be, totally or partially, further distributed, published, copied or disseminated, in any way or form, for profit or not.
2. **Commercial use:** This database is not designed for any commercial use and should only be used for academic researches.
3. **Publications:** Any publication using this database should include a citation of the article: Fleury, A.; Vacher, M. and Noury, N.; « SVM-Based Multi-Modal Classification of Activities of Daily Living in Health Smart Homes: Sensors, Algorithms and First Experimental Results ». IEEE Transactions on Information Technology in Biomedicine, Vol. 14(2), March 2010, pp. 274-283 (DOI:10.1109/TITB.2009.2037317).
